

# SynTrac TRR 364

To realize the vision of a future, climate-neutral air transportation system, the overall efficiency of aircraft must be significantly increased.

*This can only be achieved if the diverse technical synergies that arise from the integration of propulsion and aircraft are consistently utilized.*

## Conducting research within SynTrac means...

- to develop highly interconnected numerical and experimental methods,
- to dissolve disciplinary boundaries,
- to work within an international team,
- to achieve success through innovative forms of collaboration.
